

LIVING FUTURE
INSTITUTESM
AUSTRALIA

2020
**ANNUAL
REPORT**

The Living Future Institute of Australia acknowledges the Traditional Custodians of the country throughout Australia on which we live, learn, and work, and recognise their continuing connection to land, waters, and culture.

We pay our respects to them and to their Elders past, present and emerging.

FROM OUR CHAIRS

PAOLO BEVILACQUA

OUTGOING CHAIR OF THE BOARD

On Saturday 7th December 2019, I arrived back to Sydney weary-eyed after visiting Seattle for the International Living Future Institute Board meetings and strategy sessions. Unfortunately, it was one of many international flights last year, not something I am particularly proud of.

I flew back through a city engulfed by smog from fires like nothing we had seen before, burning 18.6 million hectares and killing 1 billion animals. The devastation of the fires carried over into 2020.

Then we moved swiftly into a global pandemic unlike anything we have ever experienced, overlayed by racial injustice and Black Lives Matter protests across the globe.

It's hard to comprehend what has unfolded over the past 12 months, let alone the community, economic and ecological destruction these events have created, but they are an important reminder of the fragility of the world we live in.

Throughout the year the Living Future Institute of Australia rode all the emotions of the community and our network. Despite the grief we shared, there were some extremely proud moments for us.

We continued to provide a platform for many to come together to learn, share and work together on a living future.

From the opening of some amazing living buildings like the Burwood Brickworks shopping centre; the formal certification of Australia's first full living building; the Sustainable Building Research Centre; many more Declare certified products, and inspiring speakers and events. I have been impressed and proud of how the staff and Board have adapted to continue this work throughout 2020.

This was also a big year for me in this work as I was elected as Co Vice-Chair of the International Living Future Institute and handed over the reins of Chair of the Living Future Institute of Australia to the extremely talented and passionate Tom Grosskopf.

When I took on the role of Chair I had a lot of reservations about my ability to contribute meaningfully. On reflection, we have made important progress. The thing for me to highlight is the "we". This is all of you reading this letter, the amazing staff led by Laura Hamilton-O'Hara, the dedicated Board, our volunteers, partners, sponsors and everyone else in the network.

I thank you for the opportunity to play a part in supporting the amazing work you all do. As someone important once said "What is the point of being alive if you don't at least try to do something remarkable?"

TOM GROSSKOPF

CHAIR OF THE BOARD

It is with much humility that I take on the responsibility of Chair of the LFIA.

There is much uncertainty to navigate, we are in unprecedented times. The economy is at a tipping point with choices being made in Board rooms across the country that will either drive us toward a new economy or entrench a paradigm leaving future generations with the challenges we were unable to face. Society appears to be fracturing along cultural and wealth fault lines.

While Australia's vibrant multicultural society has insulated us from the turmoil seen across the globe, there is much to do to capitalise on our advantage. From our first peoples to the latest arrivals, an acknowledgement of the past and the forging of a future based on equality of opportunity must be the driving forces for a culturally rich and socially just society.

The feedback from our environment is clear, business as usual is a pathway to increasing risk to every species, humans included. Our challenge is to move beyond sustainability, to heal and restore our environment and the ecological processes upon which our prosperity is founded.

There has never been a time where our mission is more relevant or important and the LFIA is ready to act.

We are poised to capitalise on significant investments from our Board, Executive, sponsors, partners and volunteers. Our retiring Chair, Paolo Bevilacqua, someone with extensive experience and impeccable credentials in the industry, has driven

expansion of the reach and influence of the LFIA. I congratulate him on his achievements and legacy.

The Board has also shown the depth of their commitment through their leadership and governance in a year that has challenged every business. I am pleased to report that we have adapted and delivered results despite the many restrictions on our operations.

My focus for the year ahead is to consolidate the position of the Living Building Challenge, and the associated programs, as the most progressive and challenging standard for the built environment and to drive growth in the community that are inspired to live these values.

Our programs will support this community to gain access to the knowledge, tools and materials to meet the Living Building Challenge and our ever-closer partnership with the ILFI will see exceptional service to all our customers.

Now is our time to act. I passionately believe our community and industry is ready for the next step in the challenge to create a living future and I invite you to make your contribution with us at whatever scale you are able.

**A SOCIALLY JUST,
CULTURALLY RICH
AND ECOLOGICALLY
RESTORATIVE FUTURE.**

FROM THE CEO

LAURA HAMILTON-O'HARA

CHIEF EXECUTIVE OFFICER

Change, done with care and vision, is an essential ingredient of legacy. This is the hard-won wisdom gifted to me by this year.

I had plenty of opportunities to learn this lesson in 2020, almost nothing is as it was at the start of the year. That is true of the global context as much as it is for LFIA.

This year brought with it a completely new operating context, the need to make then remake plans and changes to the Board and staff team. Every month felt alive with challenges but equally, it contained the promise of regeneration.

One such moment came at the end of August. With the completion of his term as Chair, Paolo handed the reins to Tom and a new part of our journey began. I would like to take this moment to thank you both for the generosity of spirit and courage you consistently bring to LFIA. I count myself lucky to be able to turn to either of you for wise counsel and a shared sense of joy in our work. I would like to extend this gratitude to the rest of our Board. You are our most dedicated volunteers and greatest ambassadors. Thank you.

We also had some big changes on the staff team. Stephen Choi stepped down from his role in May. However, as someone so woven into LFIA history, I hope Stephen will be part of our story for many years to come.

Alycia Crofton found her dream role as a researcher for Gardening Australia and stepped down in September. While she is missed, I love that she is rising up to new

challenges and flourishing. Thank you to both of you for helping me find my feet, I loved working together.

Toward the end of the year, we welcomed two incredibly talented women, Alegria Alano and Nicola Smith to the team. I cannot wait to see the impact we will create together in 2021.

Through all of this, we were able to deliver exceptional programs, and grow our impact and influence. In the last 12 months, our membership grew by 25%, the number of Australian Declare labels doubled to 48 and new LBC projects are being pitched and planned every week.

I would like to thank the ILFI for their continued support and camaraderie as we strive together to achieve an ambitious global vision, on the Australian stage.

I would also like to thank our sponsors, volunteers, ambassadors, and collaboratives for all your incredible support this year.

For a bold mission like a Living Future to succeed, it needs to be valued and held in the hands of many people, each of whom walk forward with it for a time and then pass the baton on.

I feel a great responsibility in holding the baton at this time, when what we choose to do with it could make all the difference in the world. I look forward to walking with all of you in 2021.

STRATEGIC PARTNERS

The Living Future Institute of Australia is delighted to have partnered with the following organisations in 2020 and look forward to working with them in the years to come.

IMAGINE A
BUILDING THAT
ANSWERS,
“WHAT DOES GOOD
LOOK LIKE?”

LIVING BUILDING CHALLENGE

THERE ARE LIVING BUILDINGS IN EVERY CLIMATE ZONE AND CONTINENT INCLUDING AUSTRALIA.

The Living Building Challenge® (LBC) is a philosophy, certification and advocacy tool for projects to move beyond merely being less bad and become truly regenerative. The LBC began as an initiative of the International Living Future Institute (ILFI), of which the Living Future Institute of Australia (LFIA) is an affiliate. Now projects from all over the world are taking up the LBC re-establishing ourselves as not separate from, but part of nature.

SUSTAINABLE BUILDINGS RESEARCH CENTRE (SBRC)

UNIVERSITY OF WOLLONGONG, NSW

The Sustainable Buildings Research Centre (SBRC) is the first development in Australia, and the third outside the USA, to achieve the Living Building Challenge®. As an organisation, the SBRC brings together students, researchers and industry to assist in the rapid decarbonisation of our built environment.

Once the funding for the project was established, it was decided that the design of the SBRC building needed to go well beyond the current Australian sustainability benchmarks for educational and other buildings.

The vision was that occupants, visitors and the general community could look back in years or decades to come, and know that the design of the SBRC stretched the boundaries of what was possible at the time of its design, and that this project represented a major

step forward in the delivery of highly sustainable buildings.

The LBC framework was a holistic way of approaching the challenge of delivering an outstandingly sustainable building, without being overly prescriptive and restricting the creativity of all involved.

The project Architects (Cox Architecture) worked closely with the SBRC/UOW leadership team to develop the concept design and coordinated the work of the many consultant groups involved.

This pioneering project was a huge team effort and has set the bar high for future LBC project teams. The legacy it leaves is definitive proof that the best is possible. Congratulations.

BURWOOD BRICKWORKS SHOPPING CENTRE

BURWOOD, VIC

Burwood Brickworks is aiming to become the first retail Living Building Challenge® development in the world. It is also the winning design in Australia's first Living Building Challenge® Design Competition in collaboration with Frasers Property Australia, who boldly went on to bring the ideas to life.

Burwood Brickworks opened to the public on Friday the 6th of December 2019. It has already won several major design awards including the 'Best of the Best' at the 2020 Architecture and Design Sustainability Awards.

The centre welcomes visitors to the great indoors with an urban rooftop farm and award-winning murals by local Wurundjeri-william artist Mandy Nicholson.

The project team also included over 200 reclaimed materials, including original

bricks that were made on-site when it was a functioning brickwork. These combine powerfully to give the building a rich sense of place and a unique story.

Burwood Brickworks is home to 46 retailers, including Woolworths, Dan Murphys, Reading Cinema and Ben & Jerry's; who each adapted their fit-out standards to meet the strict requirements of the LBC. What they learnt along the way has been applied to other stores around the country, expanding the impact of this project far beyond its site boundaries.

This community hub in the middle of suburbia is proving that an LBC project on such a large scale is possible, desirable, and transformative.

Congratulations to Frasers Property Australia and the entire development team.

TECHNICAL WORKING GROUP

We are pleased to introduce the founding members of the industry-led Technical Working Group who were appointed in October. Using their extensive expertise, their remit is to help contextualise the Living Future programs for Australia and develop crosswalks with local standards with the ultimate aim of many more Living Buildings.

PROGRAMS: BIOPHILIC DESIGN INITIATIVE

The message this year is loud and clear. We must change and those that do, will thrive in this new world we now live in.

Humans have for too long taken everything for granted. We have engineered our way to making products designed to break and be thrown away, and buildings that consume energy and water like they are infinite while producing too much waste. In 2020, due to a virus we didn't expect or control, we have proven that we can live, work and play by using less. Above all, we have realised that our connection to nature is critical to our sense of happiness and wellbeing.

We have flocked to parks, beaches and nature reserves like we have only just discovered them for the first time. This response means our time for biophilic design is now.

I would like to thank everyone who has contributed to the Biophilic Design Initiative and supported our work. Our

amazing committee members for your massive contribution, everyone who spoke, or attended one of our events, and those who volunteered their time to create or share information across your networks.

Now it's time to put our hard-work, ideas and commitment to biophilic design into action. In 2021 we must ensure our investment to kick-start the economy must be in projects and initiatives that weave nature back into our everyday lives, not because it's nice, but because we have to.

SUZIE BARNETT

BOARD MEMBER, CHAIR OF THE
BIOPHILIC DESIGN INITIATIVE PANEL
AND GM JUNGLEFY

BIOPHILIA PHOTOGRAPHY COMPETITION

This year the Biophilic Design Initiative's annual photography competition was based around the theme of water. Over 60 entrants explored the broader theme within the categories of water features, shape and form, pattern and process, abundance or absence, water and place, and water and humans.

The competition culminated in an awards night held in February where we examined the importance of our relationship with nature through the work of these talented photographers.

Thank you to competition sponsors, Aquacell, and to our Judges Colin Fisher, Andy Newlyn, Alex O'Mara, Beau Pilgrim, Kathryn Friend and Jack Mitchel.

OVERALL WINNER

PEOPLE'S CHOICE

OCEANIA BIOPHILIA SUMMIT

The second annual Oceania Biophilia Summit focused on the theme of 'Prospect & Refuge'. We planned to escape to a country retreat in NSW and immerse ourselves in nature. Alas, 2020 forced the Summit to go digital, which perhaps highlighted the importance of biophilic design.

Over two days, 117 participants took part in a virtual Wayapa session, heard from the likes of Google, Terrapin Bright Green and ASPECT Studios, and participated in panel sessions and workshops. The second day got practical, with a problem-solving team design sprint challenge. Teams had the choice of a playground design focused on culture and place or a social housing project that eliminated social stigma and showcased connection and belonging.

Thank you to all our speakers, the Biophilic Design Initiative panel and Rākeiora, Living Future New Zealand for your curation and hosting help, as well as Plunkett Street School and Metro Community Housing for providing the design challenges. Being online meant that we welcomed incredible speakers and guests from all over the world all with a very small carbon footprint!

The Oceania Biophilia Summit is an annual collaboration between the Living Future Institute of Australia and Rākeiora, Living Future New Zealand. In 2021, it will be held in Wellington NZ, which is a biophilic city.

BIOPHILIA PHOTOGRAPHY AWARDS

SYDNEY

The winners of our annual photography competition were announced at a wonderful evening by the water. Thank you to Aquacell for sponsoring the competition, our judges and entrants for a wonderful celebration of biophilia.

INTRODUCTION TO THE LIVING BUILDING CHALLENGE®

ONLINE

LFIA hosted a webinar to discuss the principles behind the Living Building Challenge®, including changes that came with the newest set of LBC standards.

LUNCH WITH LIVING BUILDING LEADERS

ONLINE

Over 12 weeks, we explored four local LBC projects. We welcomed 30 guest speakers and 122 attendees who took part in live Zoom building tours, discussions and 'ask me anything' Q&As. In telling their stories, including the triumphs and the lessons learned, this series highlighted the incredible talent behind these world-leading buildings and gave new project teams the confidence to step up to the challenge.

BIOPHILIC DESIGN WORKSHOP

ONLINE

Our two-part Biophilic Design workshop attracted participants from Sydney, Melbourne, Adelaide, Brisbane, and New Zealand. Workshop sessions explored biophilic design principles, case studies and how to incorporate biophilic design elements into projects.

LIVING FUTURE COLLABORATIVE

We would like to thank our collaborative volunteers for their support in 2020 and look forward to the year ahead.
